Experiment 11: Designing Pages and Navigation for a Multi-Page Business Application in Zoho Creator

Aim

To design pages and a navigation menu for the Leave Management System so that users can move easily between sections.

Objective

- Understand pages, sections and menus in Zoho Creator.
- Create a Home page with buttons and text.
- Arrange forms and reports in the application menu.
- Test navigation between pages.

Planned Application Structure

Section / Page	Content	Intended User
Home (Page)	Welcome text, buttons: Apply Leave, My Leaves	All employees
Apply Leave (Form)	Leave Request form	Employees
My Leaves (Report)	List of leave requests	Employees
Manager Panel (Section)	Pending requests report, dashboard	Managers / HR

Procedure

1. Open the Leave Management System in edit mode and click **+ Page** from the left panel.
2. Name the page **Home** and choose a blank layout.
3. Drag a **Text** element and type the heading 'Leave Management System' with a short welcome line.
4. Drag two **Button** elements: 'Apply Leave' (action: open form Leave Request) and 'My Leaves' (action: open report).
5. Add a **Banner / Image** element with the company logo if available.
6. Save the page and use **Preview** to check the layout on desktop and phone.
7. Go to the **Settings** or menu option of the application and open **Navigation / Menu**.
8. Create a section 'Employee' and drag in Home, Apply Leave and My Leaves; create a section 'Manager Panel' for the pending report.
9. Drag the Home page to the top and set it as the **landing page**.
10. Use the **Access Application** option and click each menu item and button to verify the links.

Attach screenshot here - Application menu with sections

Design Tips Followed

- Keep the menu short with clear names.
- Place the most used action (Apply Leave) on the Home page.
- Group related items in sections.
- Use the same colours and fonts across pages.

Results

A Home page with action buttons and a grouped navigation menu was created. All buttons and menu items opened the correct form or report.

Conclusion

Well-planned pages and navigation make an application easy for non-technical users. Zoho Creator's page builder makes this possible with simple drag-and-drop elements.
